

Getting the funds to keep your business running

It has been widely reported that the vital Government-backed Coronavirus Business Interruption Loan Scheme (CBILS) is complex to navigate, that the decision-making process is considered lengthy and that too many applications are declined.

Partly, this is because businesses fail to present a strong enough case for success. A thorough, high quality, loan application will increase the chance of a quick decision and a timely release of funds.

Companies that are fully prepared will be more likely to leverage the CBILS loan window of opportunity.

We can help you succeed by guiding you through every step of the process.

Initial Assessment

We will work with you to form an initial assessment of the likelihood of success in accessing CBILS funding, and the amount potentially available.

High Quality Application

We will guide you in producing a high-quality application and manage the process, ensuring a quick response and maximising the chance of success.

Negotiating Loan Terms

We will help you negotiate loan terms, using our market insight to make sure these are reasonable.

Should you wish not to proceed with CBILS, we are well placed to suggest alternative strategies and/or sources of funds. Fees are flexible according to the needs of your business and size of your loan.

Why us?

We have for your benefit:

Market insight

An understanding of the process and strong relationships with lenders

Track record in raising finance, often in challenging circumstances

Next Steps

Please email our CBILS Rapid Response team at **CBILS@salamanca-group.com** where a member of our team will be in touch within one working day to arrange a call.
